

Delivering Excellence

Reflecting Imagination

## Who we are

MadoX Technologies Pvt Ltd is an engineering and manufacturing solutions company, incorporated in 2008. MadoX is specialized in providing Industrial Automation Solution to various industry verticals.

The Company is a brain child of young and enthusiastic professionals with a determination to excel in the sphere of industrial automation. MadoX is driven by principles providing an environment for change, innovation, creativity, challenge & achievements. As a mechatronics solution provider we consistently deliver safe, reliable, intelligent & economical solutions.

Madox has successfully commissioned many projects which have an involvement of automation tools like Robot, PLC, SCADA and Distributed Control System with thousands of I/O's. We execute the projects on turnkey basis starting from conceptual design to the commissioning. We have already catered to the markets of all over India, Southeast Asia & Middle East.

**Mission** "To help our customer realize better industrial productivity with the use of our cutting edge technology, expertise and products"

**Vision** "To be a globally respected company in the field of Industrial Automation"

## What we offer

### Industrial Automation

Automation has become the basic need of the industries and it is hard to imagine a production landscape without industrial automation system. We are specialized in customized, turnkey automation solution using various modern automation tools like DCS, SCADA, PLC, HMI, Robot, Drives, Networks, etc. We provide control & instrumentation solutions to various industries, like

### Process Sector

- Oil & Gas
- Water Treatment
- Cement & Steel
- Paper & Sugar
- Food and Beverages
- Pharmaceuticals

### Engineering Services

For majority of industries, engineering & design activities are an exception rather than norm. In most cases the Design follows set of processes and practices with engineering inputs at critical junctions. Through our experiences in the various engineering and management disciplines across the industry verticals, we have moulded a systematic way of working method aiming for better productivity. The ranges of engineering services which can be offloaded to us in the various disciplines are,

- Electrical & Instrumentation Engineering
- Control System Engineering
- Reverse Engineering
- Technical Consultation
- AMC of Plant & Machineries

### Manufacturing Sector

- Automobile Assembly Line
- Material Handling
- Machine Handling
- Packing & Transportation
- Testing & Inspection
- Production Line

### Panel Manufacturing

Madox is having a state of art facility for the panel design and manufacturing. We are expertise in doing variety of Automation panels, Control panels, Electrical distribution equipment, MCC & PCC Panels, Switchboards & Control desks.

### Solution's On

# Areas of Specialization

Water Treatment plant control & instrumentation  
Process plant controls for Cement, Steel, Paper, Oil & Gas  
Robotic applications – Handling, Welding, Assembly & Painting  
Controls for Machine Tools & SPM's using CNC Technology  
Up gradation or conversion of obsolete controls to new one  
Engineering Services & Software development in DCS/SCADA/PLC  
Customised panel solution for electrical & control application  
Computer based automation solution for Analysis & Testing  
Customised Training Kits for Technical Institutes

## Why choose us

We provide solution that seamlessly fit in to your operation  
Delivery ranging from concept to commissioning  
Highly qualified, diverse and motivated engineering team  
A very good proven track record
