

Empowering Industries with Advanced
Control Solutions

PLC / SCADA / DCS | Digitization / IOT | Automation Excellence

Revolutionizing the Future of Automation

At **Madox Technologies Pvt. Ltd.**, we are redefining automation with innovative control solutions tailored to the needs of modern industries. Established in 2009, we bring over 15 years of expertise and a track record of 500+ successful installations across a wide range of industrial sectors.

Our approach goes beyond traditional automation, delivering transformative, turnkey solutions from conceptual design to commissioning. Backed by a customer-centric philosophy and a highly skilled engineering team, we integrate cutting-edge technology with unparalleled reliability, ensuring seamless operations with minimal maintenance.

We collaborate with world-leading manufacturers to provide solutions that prioritize simplicity, efficiency, and operational excellence, allowing businesses to reduce downtime and maximize productivity. Our domain expertise spans industries such as Cement, Steel, Chemical Processing, Water Treatment, Energy, and Building Management, making us a trusted partner for complex and specialized applications.

Industries We Serve

Our versatile solutions are designed for scalability, adaptability, and precision, catering to a diverse range of industries:

- Energy
- Mining
- Food & Pharmaceuticals
- Water Treatment
- Cement & Steel
- Chemical Processing
- General Manufacturing

We are proud to be an official partner of globally renowned brands such as:

We also provide solution using brands such as

DCS / SCADA / PLC Solutions

We specialize in delivering comprehensive DCS, SCADA, and PLC solutions, tailored to the unique requirements of various industries. Our expertise encompasses:

DCS (Distributed Control Systems): We design and implement robust DCS architectures for complex process control, providing distributed control, advanced process automation, and integrated safety systems. Our expertise includes configuration, programming, and commissioning of leading DCS platforms.

SCADA (Supervisory Control and Data Acquisition): Our SCADA solutions provide centralized monitoring and control of geographically dispersed assets. We develop custom SCADA applications that focus on data acquisition, alarm management, historical data logging, and remote control.

PLC (Programmable Logic Controls): We deliver reliable and scalable PLC control solutions to automate industrial processes. From system design to programming and implementation, our PLC solutions are engineered to boost efficiency, enhance productivity, and provide greater control over your operations.

Digitalization & IOT Solutions

We empower your digital transformation journey with cutting-edge IOT solutions. We connect your physical assets, collect valuable data, and provide actionable insights to optimize operations, improve efficiency, and drive innovation.

Control Panel Solutions

We focus on designing and manufacturing high-quality, custom control panels tailored to your specific automation requirements. Built for reliability, performance, and compliance with industry standards, our panels ensure seamless system integration and efficient operation.

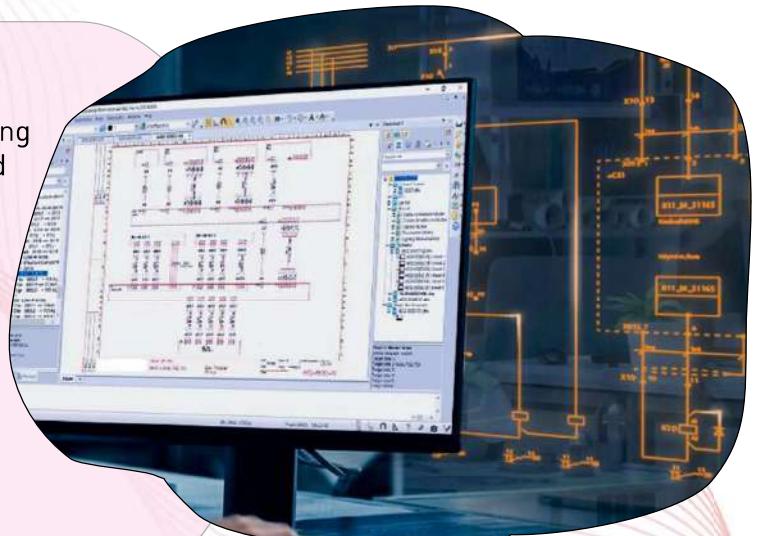

Our Products Portfolio Includes

PLC Panel, Drive Panel, MCC Panel, E Houses, Draw Out Panels, Explosion Proof Panel, Test Bench Panel, etc.

Engineering Services

We offer a comprehensive suite of engineering services to optimize your control systems and drive operational efficiency. Our experienced team delivers end-to-end solutions, from design to commissioning, tailored to your automation needs. The areas we serve are

- Logic Development in DCS/SCADA/PLC
- Hardware Design Engineering
- Digitalization / IoT Services
- Installation & Commissioning
- Support & Maintenance

WHY CHOOSE US

Top-Quality Automation

We provide reliable, high-precision automation solutions that meet global quality standards.

Cost-Effective Solutions

Our technology balances innovation with affordability, delivering maximum value.

Scalable Services

Flexible solutions that grow with your business, adapting to evolving needs.

Expert Team

Skilled professionals create custom solutions using the latest robotics and AI advancements.

Global Compliance

Our solutions adhere to international quality and safety standards.

Advanced Infrastructure

Cutting-edge facilities ensure efficient, high-quality project execution.

On-Time Delivery

We guarantee quick, reliable project delivery without compromising quality.
